Buildings Mangalore Sanitized	South Kanara Dist - - Sinking of a well - - Estimate Rs 860/-	Veterinary Hospital	

.O.C. No.9505-II/52.

From:

Sri V.R. Rajagopalan, GMVC., Dip., Bact., (Manchester),
Director of Animal Husbandry, Madras.

To

The Deputy Secretary to Government,
Development Department, Madras.

97911

Sir,

Sub: BUILDINGS--South Kanara District--Veterinary
Hospital, Mangalore--Sinking of a well--
Estimate Rs.8,650/- --- Sanction of.

---oOo---

The well in the Veterinary Hospital, Mangalore collapsed at the time of Monsoon during the year 1948. The question of deepening of the well was taken up with the Executive Engineer, South Kanara District immediately and the Executive Engineer reported that the reformation and deepening of the sunken well would be prohibitively costly and as an alternative he suggested a proposal for supply of water from the special sub Jail, Mangalore by connecting pipe lines and the matter was taken up by the Executive Engineer with the Inspector General of Prisons. The above proposal to supply water to the Veterinary Hospital and the staff of this Hospital, viz., Veterinary Assistant Surgeon, Compounder and 3 menials who have been provided with quarters, from the well in the Warder's line of the Special Sub-Jail, Mangalore, subject to the jail requirements being fully met first, was approved by the Government in their Memorandum No.41600-N/49-4, Home Department, dated 16th August, 1949. Accordingly, the estimate prepared by the Executive Engineer, South Kanara Division, Mangalore for Rs.900/- for providing water supply by connecting pipe line from the special Sub Jail, was approved by this office in September, 1949 and work was got executed by the Public Works Department.

2. The Jail authorities allow water as and when they like and the Veterinary Hospital is always at the mercy of the Jail Department, as this Department has no control over the water supply. Besides, the water supply was completely cut off in December, '51 and January, '52. This state of affairs greatly affects the working of the institution, as water is to be got from a distance of more than a furlong through the attendants to meet the full requirements of the Hospital. The staff, who have been provided with quarters in the Hospital, also experience much difficulty for water. In the circumstances I consider that a well in the hospital premises is absolutely necessary and very essential to have independent and sufficient supply of water for the Veterinary Hospital and the staff.

3. I forward herewith plan and estimate amounting to Rs.8,650/- (Rupees Eight Thousand Six Hundred and Fifty only) for sinking of a well in the Veterinary Hospital, Mangalore and I request that the government will be pleased to accord their administrative approval for this work and sanction to the estimate.

4. The expenditure is debitable to "50-a-Original works--Buildings I. Ordinary areas-0 Veterinary, Major Works."

Yours faithfully,

B. R. Rajagopalan

for Director of Animal Husbandry, Madras.

Enclosures: No. Roc.No.1363/W2/52 dated 11th December 1952

Sir,

Sub:- JAILS - Special Sub Jail, Mangalore - Water Supply from the Jail to the Veterinary Hospital, Mangalore - Remarks - Submitted.

Ref:- Government Memorandum No.97971/E/52-3, Development dated 10-10-52.

--:-

With reference to the Government Memo. cited, I enclose herewith copies of letter G.13/52 dated 27-10-52, of the Superintendent, Special Sub Jail, Mangalore, together with its enclosures, and No.3305.M dated 21-11-52, from the Executive Engineer, South Kanara Division, Mangalore, for favour of information of Government.

In this connection, I may state that there generally is water scarcity in Mangalore during the summer months and especially in the Special Sub Jail Mangalore, as it is situated on an elevated place and that the wells in the premises of the Special Sub Jail, Mangalore are usually almost dried up then, rendering the supply of water from the wells inadequate. In view of the above fact, it is beyond the possibility for the Special Sub Jail, Mangalore, to supply water to the Veterinary Hospital, Mangalore during the summer months. I may also submit that the Superintendent, Special Sub Jail, Mangalore, has stated in his letter referred to above, that water was supplied to the Veterinary Hospital during December 1951 and January 1952 and the water supply to the Veterinary Hospital was never cut off during this period but water could not be supplied to the Veterinary Hospital during the summer months of April and May, 1952, and water had to be brought from outside even to supplement the jail wells. As regular supply of water, from the Jail to the Veterinary Hospital, Mangalore, cannot be ensured owing to acute scarcity in Mangalore during summer months, I am of opinion that it would be better and advisable, if the Animal Husbandry Department have a well of their own in the Veterinary Hospital Mangalore.

TGS.12.12.

INSPECTOR-GENERAL OF PRISONS.

2

Copy of letter No.C.1./52, dated 27-10-52 from the Superintendent, Special sub jail, Mangalore to the Inspr. Genl. of Prisons, Madras.

Sub: Jails - Special sub jail, Mangalore - Water supply meeting the requirements of the Veterinary Hospital, Mangalore - Remarks - Offered.

Ref: Copy of letter No. Roc. 9505-II/52 dated 20-8-52 from the Director of Animal Husbandry to the Deputy Secretary to Government, Development Department, Madras communicated in Inspr. Genl.'s No. Roc 1363/W2/52, dt. 22-10-52.

The pump in the Warders Line well has gone out of order several times and the jail had to face critical situations. Water supply to the jail had been, and is still an anxious problem. One of the larger pumps ~~form~~, *found*, unserviceable has yet to be replaced. As such, when this jail has been having great difficulty in getting its own supply, there is hardly any cause for a complaint.

I maintain that during December 1951 and January 1952 water was supplied to them as usual; but in April and May 1952 when the wells dried up the jail was forced to draw water from the wells and also from the neighbouring Canara High School (playground) well to supplement its requirements.

A | It is open to them however to make their own arrangements if they so desire, and it is regretted this jail is not in a position to help them any further in this matter.

Copies of the correspondence on the subject are enclosed.

- Encl: 1. Copy of letter No. 994-M-II A 10 dt. 19-4-49 from the Executive Engineer, P.W.D. Mangalore.
2. Inspr. Genl.'s letter No. 127/S2/47, dated 12-5-49.
3. Copy of Government Memo No. 41600-N/49-4, Home Department, dated 16-8-49.
4. Copy of letter No. 710/48 dated 10-9-49 from the District Veterinary Officer, South Kanara, Mangalore.
5. Copy of letter No. G. 13/51, dt. 31-5-52 of the Superintendent, Special sub jail, Mangalore.

/True Copy/

Copy of letter No. 994 M IIA 10 dated 19-4-49 from the Executive Engineer, South Kanara Division, Mangalore to the Superintendent, Special sub jail, Mangalore.

Sub: Veterinary Hospital, Mangalore - Supply of water from the Special sub jail, Mangalore well.

Ref: Your letter No. G. 13/49, dt. 15-2-49.

The Dt. Veterinary Officer, South Kanara has stated that a minimum quantity of 1000 to 1500 gallons of water may be required per day for the use of the Veterinary Hospital and 5 families remaining within the hospital compound. A water meter may be installed and a rate of annas eight per one thousand gallons plus a meter rent of rupee one per month may be collected. Necessary action may please be taken to obtain the approval of the Inspector-General of Prisons for this.

P.T.O

8-12
-2-
Copy of Inspector-General's No. 1227/S2/47 dated 12-5-49 addressed to the Superintendent, Special sub jail, Mangalore.

Special sub jail, Mangalore - Water supply - Replacement of hand pump in the warders' line compound by Electric Motor - Suggestions of Executive Engineer, P.W.D., Mangalore to supply water to the Veterinary Hospital and Staff - Orders.

The Superintendent is informed that there is no objection for the supply of water to the Veterinary Hospital and staff, attached to it, provided there is water enough and to spare after meeting the entire requirements of the jail. He should get an undertaking in writing from the District Veterinary Officer, South Kanara, Mangalore to the effect that he will not enforce the supply of water from the jail should there be scarcity of water due to unforeseen circumstances and that he will pay for the water at eight annas per 1000 gallons and a meter rent of Rs. 1/- per month.

Government are being addressed separately and their orders will be communicated on receipt.

/true copy/

Copy of Government Memo No. 41600-N/49-4- Home Department, dt. 16-8-49 communicated in Insp. Genl.'s No. R.Dis. 1227/S2/47, dt. 26-8-52.

Sub: Jails - Special sub jail, Mangalore (South Kanara District) - Supply of water to the Veterinary Hospital and staff.

The Government approve the proposal of the Inspector General of Prisons to supply water to the Veterinary Hospital and staff at Mangalore from the well in the warders line of the Special sub jail, Mangalore, subject to jail requirements being fully met with first. They however direct that there is no need to raise a debit against Animal Husbandry Department for the water so supplied.

R.Dis. 1227/S2/47.

Office of I.G. of Prisons, Madras,
dated 26-8-49.

Copy communicated to the Superintendent, Special sub jail, Mangalore for information.

2. The Superintendent should get an undertaking in writing from the Dt. Veterinary Officer, South Kanara, Mangalore to the effect that he will have claim for water only if the jail can spare it. He need not raise any debit against that department.

/true copy/

Copy of letter No. 710/48, dt. 10-9-49 from the District Veterinary Officer, South Kanara, Mangalore to the Superintendent, Special sub jail, Mangalore.

Sub: Jails - Special sub jail, Mangalore - Supply of water to the Veterinary Hospital and staff.

As required I am furnishing the required undertaking.

I undertake to claim water for the use of the Veterinary Hospital and quarters attached thereon from the well in the warders line of the Special sub jail, Mangalore on your requirements being met first. Further action necessary, for early supply may kindly be arranged.

Copy of letter No. G. 13/51, dt. 31-5-52 from the Supdt., Special sub jail, Mangalore to the Veterinary Asst. Surgeon, Mangalore.

Sub: Water supply to the Hospital and quarters.

As the water level in the well has gone down below the suction pipe, it is not possible to supply water regularly

/true copy

(continued)

Copy of letter No. 3405 A, dated 1-11-52 from the Executive Engineer, South Kanara division, Mangalore to the Insp. Genl. of Prisons.

Sub: Buildings - Jails - Special sub jail, Mangalore - Water supply from jail to the Veterinary Hospital, Mangalore.

Ref: Your letter Roc. 1363/M2/52, dt. 22-10-52.

21 There are two wells, two overhead tanks, and two pumps in the sub jail compound to feed the two overhead tanks.

During my inspection on 24-9-52 one of the pumps driven by 1 H.P. motor located in the garden was out of commission, as the electric motor was reported to be not in good working order. The pump is a plunger pump of Myers make and was feeding the overhead tank near the sub jail proper and has a discharging capacity of 720 gallons per hour. The yield from this well according to the jailor is sufficient during the months of January to April to discharge 720 gallons per hour, the capacity of the pump for eight hours of the day. The second pump is located near the warders lines being of a larger size and driven by a 2 H.P. motor and has a discharging capacity of 975 gallons per hour and is able to pump out 520 gallons per hour for eight hours during the severe summer of January to April 1951 and 1952 and can pump water into the overhead tank in warders lines or the supply main issuing from the overhead tank near jail proper to jail garden and the veterinary hospital. The present low discharge of this pump is due to the chamber being not in order. After repairs to this the discharge may improve.

2. An estimate was sanctioned for replacing the 2 H.P. motor by 3 H.P. motor to increase discharge from warder's lines pump with reference to your letter No. 149/A6/51, dt. 4-4-52 and on my assuming charge, I found that the maker's instructions are that the pump should not be run at more than 280 Revolution per minute and that the discharge of the pump cannot be increased by changing the motor as the present speed of the pump shaft is nearly 280 Revolution per minute after actual test. The only way to augment the supply is by installing another pump and I am just informed that the cost of the additional pump yielding 440 gallons per hour extra will be Rs. 1800/- and as your department has already asked for increasing the discharge of the pump from the present well in warder's lines, it is presumed that the necessary extra yield of 440 gallons per hour will be available from the well to supply water to the Veterinary Hospital premises also.

3 The conditions of supply from this new pump and after repairs to 1 H.P. pump can be watched before the excavation of the well is taken up in the veterinary hospital compound.

4 But both your staff and veterinary staff should be abundantly aware that water supply in all wells are precarious in Mangalore in summer especially in elevated places like the one at which sub jail is situated and that water should be used with utmost care.

5 During my inspection of the veterinary compound on 12-11-52, I found copious supply from the tap both in the Veterinary Hospital and residential compound and the Assistant Veterinary Surgeon was with me during inspection.

FOR INSPR. GENL. OF PRISONS

Roc.No. 2886-II/53

87734

ANIMAL HUSBANDRY DEPARTMENT,
Triplicane Post, Madras,
Dated the 6th July, 1953.

13

From

Sri V.R. Rajagopalan, GMVC., Dip., Bact., (Manchester),
Director of Animal Husbandry, Madras.

To

The Deputy Secretary to Government,
Development Department, Madras.

Sir,

Sub: Buildings - South Kanara District - Veterinary
Hospital - Mangalore - Sinking of a Well.

Ref: Govt: Development Department Memo No. 97911-E/52-10
dated 19-3-1953.

With reference to para 3 of the Government Memo cited above, I submit that a 6" to 4" trial boring to a depth of 125 feet will cost about Rs. 2,750/- according to the estimate furnished by the Assistant Industrial Engineer, Coimbatore (Copy enclosed for information) during the year 1950. In addition to this, the cost of a deep well pump set, which is approximately Rs. 410/--should also be included.

✓ While on this matter, I may state that a proposal for boring a well was considered as early as 1950. The approximate estimate with a copy of the report dated 13-6-1950 of the Mechanic in charge, Mangalore is enclosed for information. The proposal for boring a Well in the Veterinary Hospital, Mangalore was later given up, following an alternative arrangement of Pipe-line connection from the Special Sub-Jail.

3 It is observed from the report of the Mechanic in charge Mangalore, in the year 1942, that trial borings were made in the compound of the staff quarters to excavate an open Well. However the borings had to be given up, because of rocks, and water was not tapped.

✓ The reports suggests, a trial boring upto 125' in the hospital compound which is on a lower level, and is west to the staff quarters, but it does not guarantee water in quality and quantity.

6 As a large quantity of water is required at the Veterinary Hospital, Mangalore and for the use of the staff quarters, and in view of the past experiences, I consider, an open well alone is preferable to ensure a sufficient supply of water.

6 I therefore, request that the Government will be pleased to consider the proposal of sinking an open well in the Veterinary Hospital, Mangalore at an approximate cost of Rs. 8,650/-

Yours faithfully,

for DIRECTOR OF ANIMAL HUSBANDRY,
MADRAS.

Copy of letter No. 3434-B2/50 dated 7-7-1950 from the Assistant Industrial Engineer, Coimbatore to the District Veterinary Officer, Mangalore.

Sub: Veterinary Hospital, Mangalore - Proposals for boring a Well.

Ref: Your letter No. 71/50 dated 31-5-1950 to the Joint Director of Industries and Commerce, Madras.

I enclose herewith a copy of report received from the mechanic in charge Mangalore. A 6" to 4" trial boring to a depth of 125'-0" in the hospital compound is suggested for which an estimate is furnished below. If the estimate is approved I shall arrange to depute the hand boring set at Mangalore for this work.

ESTIMATE FOR A 6" TO 4" TRIAL BORING TO A DEPTH OF 125'-0" .
BELOW G.L.

1. Transport of H.B. Set.	...	Rs. 100	0	0
2. Labour, 8 men at Rs. 2/- per head for the first 50'0" (8 days)	...	Rs. 128	0	0
3. 10 men at Rs. 2/- per head per day for 100 days.	...	Rs 2000	0	0
4. Hire charges of the set at Rs. 1-12-0 per day for 108 days.	...	Rs 189	0	0
4. Charcoal; Oil, grease cotton waste etc	...	Rs 175	0	0
5. Watchman at Rs. 30/- p.m. for 4 months	...	Rs 120	0	0
6. Miscellaneous.	...	Rs 38	0	0

		Rs 2750	0	0

An invoice for service rendered will be sent towards the hire charges of a hand boring set. Other items of expenditure will be borne by you in the course of work.

Copy of letter 305/16 dated 13-6-1950 from the Mechanic in charge Mangalore to the Asst. Industrial Engineer, Coimbatore.

Sub: Veterinary Hospital, Mangalore - Water supply.

Ref: Copy of Ref. No. Rob.319/49 dated 30-5-1950 from the Veterinary Asst. Surgeon, Mangalore to the Joint Director of Industries and Commerce, Madras.

As requested in the reference cited above I had been to the Veterinary Hospital, Mangalore on 13-6-1950 and interviewed the Asst. Surgeon. The Hospital is situated in the eastern side of the Government Higher Grade Training School for men on the Jail Road and is about 1½ mile from Mangalore Railway Station. The hospital is situated on the western side of the Jail Road, and the staff quarters are on the eastern side.

The one well in the hospital compound is collapsed and there is no well in the staff quarters compound. So great difficulty is experienced for water in the both the places. So the Asst. Surgeon likes to have at least a borewell fitted with a hand pump. In the year 1942 two trial bores were tried in the Staff quarters compounds to excavate a open well. As rock was met with and as no water was tapped this was abandoned.

81
16

The Hospital compound is to the west of the staff quarters and is at a lower level. So I suggest to put down a 4" trial bore up to 125ft deep below G.L. If good water is tapped at higher levels in soil, boring in rock can be stopped and the work of constructing a open well can be taken up. If there is not sufficient spring at the top boring can be continued to see whether springs can be tapped at lower levels. I am here below furnishing a rough estimate to put down a 4" trial bore up to 120 ft. below G.L. But no guarantee can be given regarding the quality and quantity of water that can be tapped in the bore. Type and size of pump to be fitted to the bore well have to be determined on testing the yield of the bore on completion of the work.

ROUGH ESTIMATE TO PUT DOWN A BORE UPTO 125 ft. BELOW GROUND LEVEL.

1. Transport charge of the set to and fro (actuals)	Rs. 100	0	0
2. Labour charge to bore 50 ft in the top considering the starta to be bored through the soil at 8 labourers per day for 8 days at Rs. 2/- per head per day.	Rs. 128	0	0
3. Labour charge to bore from 50 ft. to 125 ft from G.L. considering the starta to be bored through rock and taking the progress as 8 inches per day on an average at 10 labourers per day (100 days)	2000	0	0
4. Hire for 108 days.	189	0	0
5. Charcoal for tempering the chisels, oil etc.	175	0	0
6. Watchman's pay to watch the tools of the set during night at Rs. 30/- p.m. for 4 months	120	0	0
7. Sundry expenses such as putting up a temp.shed.etc	38	0	0
	2750	0	0

Hire charges of the Hand Boring set for 120 days at Rs.1-12-0 per day will comes to Rs. 210/- Cost of the lining-pipes etc., left in the bore, if the bore successful it will have to be paid by the Veterinary Department by Book-Adjustment.

The Veterinary Department will have to arrange to transport the set to and fro and to supply necessary labour, charcoal and other facilities required for the boring work.

Cno 97911 E/52 Sub: Buildings - South Kanara District -
Veterinary Hospital, Mangalore -
Sinking of a well - Estimate for
Rs 8,650 - Sanction.

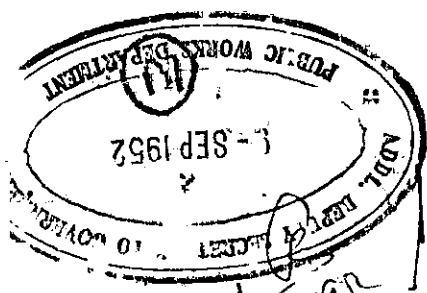

Ref: From the D.A.H. 9505 II/52 dt 20.8.52.

The D.A.H. in his letter in p/cf has
stated that the well in the Veterinary Hospital
Mangalore collapsed during the monsoon of 1948.
As it was considered that the deepening
of the sunken well would be prohibitively
costly it was suggested to take water
from the well in the Wardens line of the
Special Sub Jail, Mangalore by connecting
pipe lines. The proposal was approved
by Govt in consultation with the I.G. of
Prisons.

Plcf (R)

plcf

The D.A.H. has now reported that
the Vety Hospital is always at the
mercy of the sub jail for water and
that water supply was cut ^{out} completely
during Dec 51 and Jan 52. The Hospital
as well as the staff therefore experience
great difficulty for water. The D.A.H.
therefore considers that a well in the
premises of the hospital is absolutely
necessary. He has also forwarded plans
and estimates amounting to Rs 8,650
for sinking a well in the Vety Hospital
Mangalore. For orders whether the above
proposal may be accepted.

9/152

Issued as Memo No 92911 E/52.3 dt 10x52

From the IG of Prisons No 1363 W2/52 dt 11.12.52

Notes from p1 above the memo to the IG of Prisons on pp 3.4 cf and his reply on p 5 cf may be perused.

2 With his reply on p 5 cf the IG of Prisons has forwarded copies of the Correspondence with the Supdt of the Sub Jail Mangalore and the Executive Engineer South Kanara Division Mangalore which will be found on pp 7.9 cf. It will be seen therefrom that there are two wells two overhead tanks and two pump sets in the Compound of the Sub jail and that one of the pump sets is being replaced. The Executive Engineer is of the view that the condition of the water supply after repairs to the pump can be watched before excavation of the well is taken up in the City Hospital Compound. The Supdt of the Sub Jail has however represented the precariousness of the water supply condition in the Sub Jail and has stated that it will not be possible for the Jail Dept to help the AH Dept in the matter and it is for me later to make its own arrangements. The IG of Prisons in his letter on p 5 cf has stated that as regular supply of water from the Sub Jail to me

2 on p 9 cf

Y on p 9 cf

A on p 7 cf

E on p 5 cf

Vety hospital cannot be ensured owing to acute water ~~scarcity~~ scarcity in Mangalore during summer months - it would be better for the A.H. Dept to have a well of its own in the Vety hospital compound.

2 In the circumstances it is for consideration whether the proposal of the D.A.H. for sinking a well in the Vety hospital compound Mangalore at an estimated cost of Rs 8650 will be supported.

4 Home Pw and Lin may see for remarks.

The delay is regretted

26/12/11

The statement in the D.A.H.'s letter that water was completely cut off from the Veterinary Hospital during Dec 1951 and Jan 1952 has been refuted by the Dy. of Inspr.

It appears from the Dy.'s letter that water was not made available

only during the summer months when scarcity of water was acute. Even if a well is sunk in the

Veterinary Hospital compound, it will not solve the problem of water scarcity during summer.

The Executive Engineer has suggested that the ^{conditions} ~~results~~ of supply from a new pump proposed and after repairs to an existing pump may be worked out before excavation of well in the Veterinary Hospital is taken up. Besides, when he inspected the Hospital on 12.11.52, he found that

A

EC

There was copious supply of water from the taps in the
 Victoria Hospital. In the circumstances
 the question of sanctioning the estimate of
 sinking a well in the Victoria Hospital
 at a cost of Rs. 6.50 may be postponed
 and the D.A. may be asked to review
 the proposal next year after watching the
 result of the supply with affected by the
 provision of a new pump &
 repairs to existing pump.

Summary.

The file relates to the proposal of the D.A.H. for the sinking of a well in the Veterinary Hospital, Mangalore.

2. After the collapse of the well in the Vety. Hospital, Mangalore during the monsoon of 1948 the Govt approved the proposal of the IG of Prisons to supply water to the Vety. Hospital, Mangalore and the Staff from the well in the Warder's line of the Special Sub-jail Mangalore subject to jail requirements being fully met first.

3. During August 52 the D.A.H. reported that the Vety. Hospital is always at the mercy of the Sub-jail for water and the supply was cut out completely during Dec 51 and Jan 52 and that the hospital and the Staff

para 1 p 1 of
pp 9-10 of 2 (R)

p 1 of

experience great difficulty. The D.A.H. therefore submitted proposals for the sinking of a well in the hospital and has forwarded estimates amounting to Rs 8,650.

(M)

4. At the instance of PWD the IG of Prisons was asked to report in consultation with the Ex. Engineer whether necessary improvements may be carried out to the well and tank in the Subjail to ensure regular and satisfactory water supply to the jail and hospital.

X on p 2 above

pp 3-4 of

5. In reply the IG of Prisons has forwarded copies of correspondence between the Supdt. Sub. jail and the Executive Engineer. It will be seen herefrom that there are two wells two overhead tanks and two pop pump. Sels in the jail and that one of the pump. Sels is being replaced. The E.E. is of the view that the condition of the water supply after repairs to the pump can be watched before excavation of the well is taken up in the Vety Hospital Compound. The Supdt. of the jail has, however represented the precariousness of the water supply condition in the jail and has stated that it will not be possible for the jail Dept to help the A.H. Dept. in the matter and it is for the ^{Govt} ~~Govt~~ to make its own arrangement. The IG endorses his view stating that regular supply of water cannot be ensured owing to acute water scarcity in Madras during summer.

SUB: BUILDINGS - South Kanara District -
Veterinary Hospital, Mangalore - Sinking
of a well - Cost of deep bore well -
Particulars.

From the D.A.H., Roc.No.2886 II/53 d/6.7.53

p1 of (u)

X on p 9 of 7

Ap 11-12 of 7

13 on p 9 NF 7

1-11-12 of 7

para 1 of 7

The D.A.H. in August 1952, submitted proposals for the sinking of a well at a cost of Rs.8650/- for the Veterinary Hospital at Mangalore as the supply of water that was being received from the Sub-Jail was not satisfactory. As it was reported that some improvements were being made to the water supply system of the Sub-jail to ensure better supply, the proposal of the D.A.H. was deferred, and he was asked to renew the proposals after watching the result of the improvements made in the Sub-Jail. In that connection the Minister for Agriculture wanted to find out what a deep bore well would cost and whether it would not be preferable.

2. While communicating the decision of Govt to defer the proposal for the sinking of a well, the D.A.H. was asked to find out the cost of a deep bore well and whether that would not be preferable. The D.A.H.'s report is on p.1 c.

3. The D.A.H. has stated that a 6" to 4" trial boring to a depth of 125 ft. will cost about Rs.2750/- as estimated by the Assistant Industrial Engineer, Coimbatore, and that in addition a sum of Rs.410/- will be required being the cost of a deep well pump set. He has also stated that the proposal for a boring well at a cost of Rs.2750/- for the Veterinary Hospital at Mangalore was considered in 1950 and was given up following the alternative

12

NO 877-44/52

arrangement of pipe line connection from the Sub-Jail. It is also seen that trial borings were made in the compound of the hospital ^{quarters} staff in 1942 to excavate an open well, and the boring had to be given up, because of rocks and as no water was tapped. The D.A.H. has stated further that the report of the Mechanic under the Assistant Industrial Engineer, Coimbatore stationed at Mangalore, has suggested a trial boring, upto 125' in the Hospital compound which is on a lower level, but ^{he} does not guarantee water in ^{quality} quality and quantity. The D.A.H. has therefore requested the Govt. to consider the proposal of sinking an open well at a cost of Rs. 8650/- as already suggested by him. It may be observed that the D.A.H. has not made any reference to the nature of present supply of water from the Sub-Jail, whether the supply is satisfactory after the improvements to the water supply arrangements at the sub jail were carried out.

4. In the circumstances it is for consideration whether the question of providing a deep bore well for the Veterinary Hospital at Mangalore will be given up and the D.A.H. asked to report whether the supply of water now received from the Sub Jail is satisfactory.
